

**The AI operating system for
your enterprise.**

Speed. Quality. Transparency.

Your central AI nervous system.

Operations, finance, sales, and compliance - in full view.

Contents

- 03 Empower your decision makers.
- 04 Universal connectivity. Zero integration.
- 05 Evolve your business at the speed of thought.
- 06 See clearly. Act quickly.
- 07 Manage risk. Create transparency.
- 08 Unify communications.
- 09 One holistic solution.

Empower your decision makers.

Let your decision makers focus on what they do best - solving problems, not dealing with systems.

Focus on judgment

You make the call. Ghost handles the execution.

Approval at your discretion

Ghost executes on instruction, or holds for your approval.

Solutions at your fingertips

Analysis, reports and models, one instruction away.

Build and deploy on demand

Develop and deploy full custom SaaS applications on demand.

Anthropic frontier models ■ Opus 5.5 ■ Fable 5.1 ■ and successors

Analysis & performance

- Operations & financials
- Workforce & staffing
- Margin optimization
- Valuation & attribution
- Navigate changing industries

Visibility

- Synthesize data
- Real-time KPI dashboards
- Spot opportunities
- Alerts & triggers
- Financial accounting
- Restructure internal systems

Risk & transparency

- Internal & external reporting
- Automated responses
- Run, review and share reports
- Audit logging

Communications

- Inboxes, comments and replies
- Triage, draft or auto-respond

Build & host

- Full SaaS applications
- Tools & workflows
- Documents & models
- Deployment & maintenance

Universal connectivity. Zero integration.

Everything is an input. Everything is an output.

Any application with a login

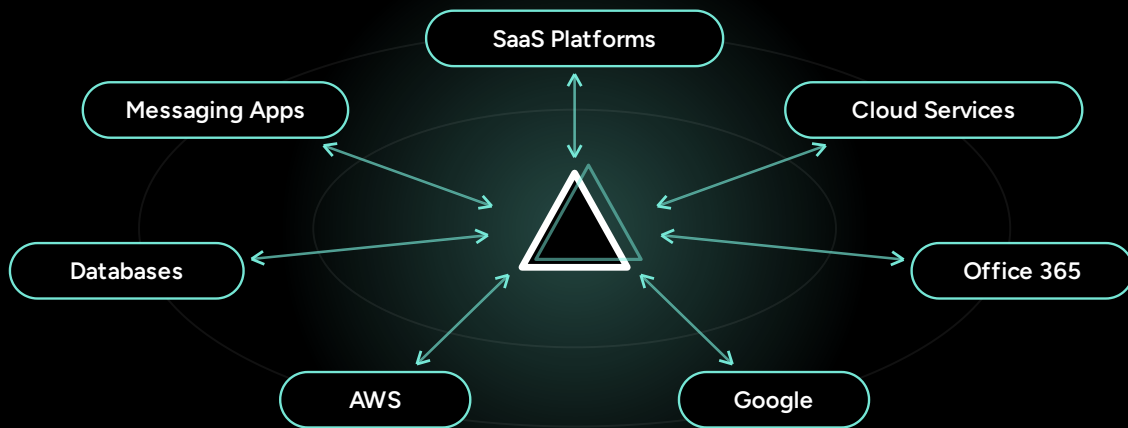

With or without an API, from a single set of credentials.

Systems in place

Ghost connects to your existing tools for data and action.

Ghost comes to where you work

Prompt via Slack, email and Telegram, text or voice. Any platform available on request.

Evolve your business at the speed of thought.

Automated consulting and implementation.

Operations and financials

Identify outperforming and underperforming segments and operations.

Margin optimization

Examine pricing, cost and mix line by line. Model each change for its effect on profitability.

Navigate changing industries

Market analysis, competitive benchmarking and research.

Workforce and staffing

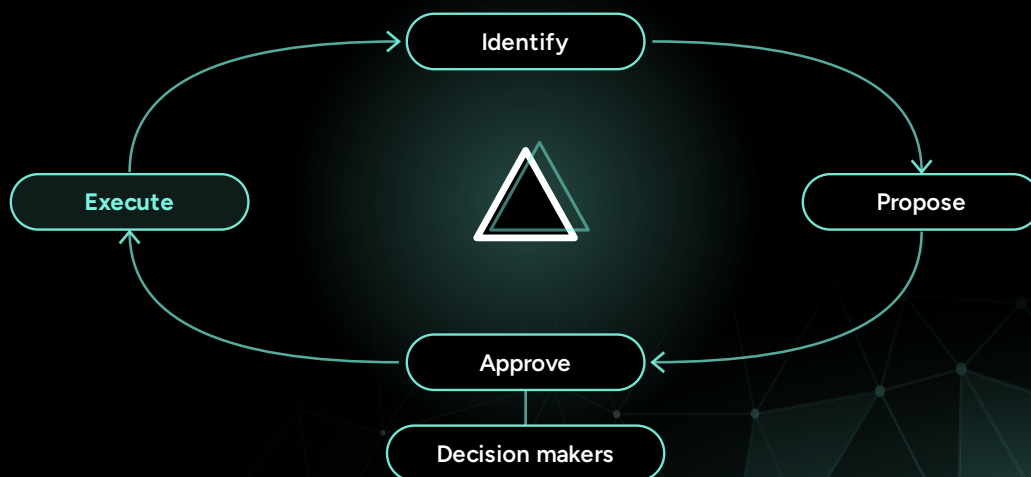

Right-size your team and identify synergies in resource allocation.

Valuation and attribution

Build models to value your assets and attribute performance.

Mitigate risk

Detect exposures early and execute corrective action.

See clearly. Act quickly.

Effortlessly consolidate, then act on data across your organization.

Synthesize data

Pull, reconcile, and consolidate.

Spot opportunities

Growth opportunities flagged as they arise and acted on within the authority you delegate.

Restructure internal systems

Duplicate effort removed, handoffs cut, workflows rebuilt for throughput.

Dashboards

Generate custom real-time dashboards with every important KPI for your business.

Accounting

Organize and prepare financial statements.

Alerts and triggers

Operating parameters monitored continuously, with an exception raised the moment one moves out of range.

Manage risk. Create transparency.

Generate internal and external regulatory reports. Automatically take action when a condition is met.

Reporting

Board packs, management accounts and regulatory filings, run on schedule or on demand.

Control

Approval applies wherever you require it: Ghost prepares, you authorize. Governance stays with you.

Automated responses

Policy rules, compliance thresholds and risk tolerances are set in advance. When one is crossed, the pre-approved response is executed and recorded.

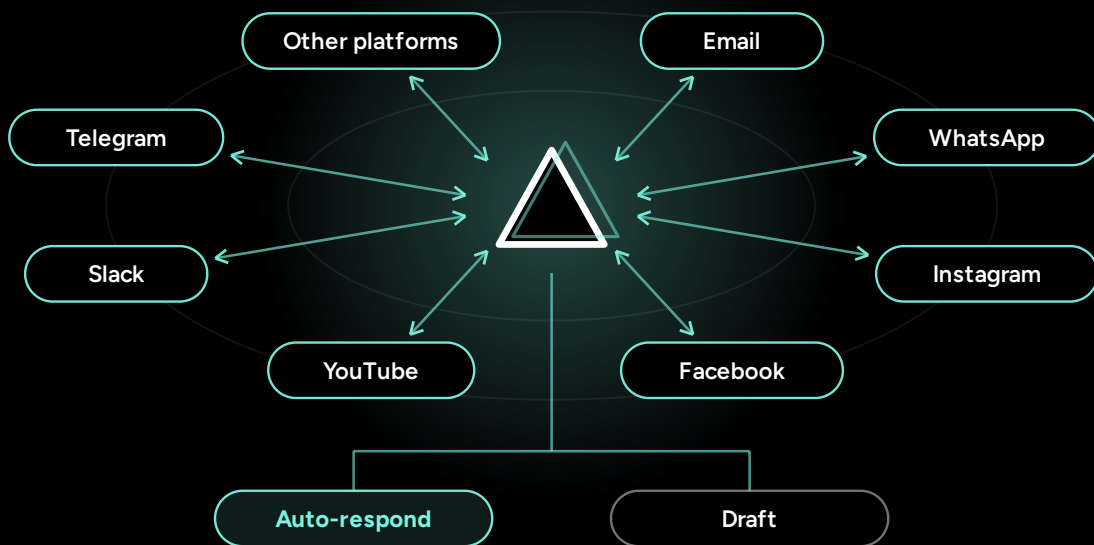

Audit logging

Every action is logged. A complete audit trail for the entire organization, queried directly through Ghost.

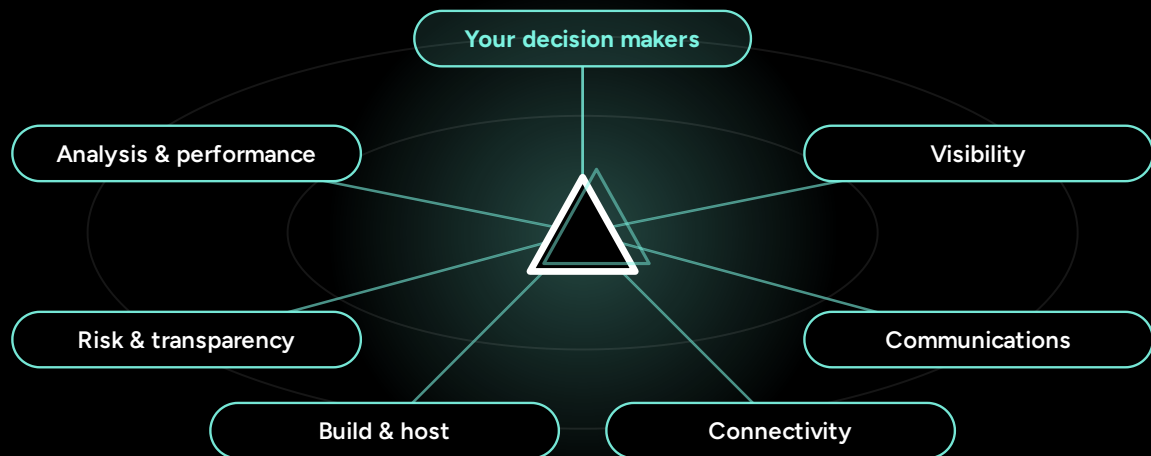

Unify communications.

Ghost natively manages all your inboxes across all platforms. It responds automatically, or drafts messages for your review.

One holistic solution.

Ghost is interconnected across your organization, making it a unified intelligence engine with its own execution environment to generate knowledge assets and intellectual capital.

**Let Ghost scale
your business.**
